DETAILED ACTION

1. This Office action acknowledges the applicant's Amendment submitted 26 May 2004. Claims 9-11 are pending in the application.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Allowable Subject Matter

3. The indicated allowability of claims 3, 5, 7, and 8 is withdrawn in view of the newly discovered reference(s) to Hartley (US 3,578,152); accordingly, this action is made **NON-FINAL**. Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 9-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Each claim recites the limitation, "each of which" in line 5. It is unclear as to whether the front side, back side, or bores are delimited by an endless limiting wall.

It is further unclear as to whether the screws are positively recited and if said screws are located in the bores.

Claim Rejections - 35 USC § 103

5. Claims 9-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Prouty (US 383,908) in view of Merrick et al (US 3,812,961) and Hartley (US 3,578,152).

To examine the claims on their merits, the examiner assumes that it is each bore that is delimited by the endless wall and that the screws are positively recited and retained within the bores.

Prouty discloses a magazine for fasteners having a front side (a'), a back side (a), and a plurality of bores (a³, a²) delimited by an endless limiting wall (a¹). Prouty does not expressly disclose screws within the bores.

Merrick discloses that it was known in the art at the time the invention was made to place screws in a magazine strip. It would have been obvious to one of ordinary skill in the art at the time the invention was made to place screws in the magazine strip of Prouty in order to provide a light weight strip for screw fasteners.

Prouty-Merrick does not expressly disclose a plurality of strips arranged side-by-side.

Hartley discloses a side-by-side arrangement of article retaining strips (see Figures 3, 8, and 9). It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide a plurality of strips arranged side-by-side as taught by Hartley in order to provide a rugged arrangement for the provision of a plurality of strips to a consumer. As is shown in Figure 3 of Hartley, the articles would

be arranged in alternating bores. It has been held that mere duplication of the essential working parts of a device involves only routine skill in the art. *St. Regis Paper Co. v. Bemis Co.*, 193 USPQ 8.

Response to Arguments

6. Applicant's arguments filed 26 May 2004, with respect to claims 9-11, have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. As the examiner has presented new grounds of rejection, this Office Action is made **NON-FINAL**.
